# Selling pressure after the holiday

## VN30 performance

The VN30-Index dropped sharply in the first trading session after the Lunar New Year, declining 1.65% to 1,315 points. Among the 30 constituent stocks, 24 closed in the red, with 17 stocks losing more than 1%. Notable decliners included FPT (-5.15%), VNM (-2.73%), VIB (-2.66%), VPB (-2.12%), SAB (-2.04%), and TCB (-2.02%). On the other hand, 5 stocks posted gains, with buying interest seen in GVR (+1.56%), SHB (+1.46%), and BCM (+1.01%).

## VN30 Future chart: Selling pressure after the holiday

On the daily chart, the contract formed a long-bodied red candlestick, signaling bearish momentum. The increasing volume suggests rising short-term risks, indicating that the downtrend may resume in the coming sessions.

On the hourly chart, selling pressure appeared early in the session, signaling a correction. Additionally, the contract closed below the 10- and 20-period moving averages, reinforcing the likelihood of continued adjustment. However, the 50-period moving average is expected to act as support in the next session, as the downward momentum eased in the afternoon session yesterday.

## Technical strategy

The contract recorded a sharp decline with several negative signals in the short term. As investors remain cautious after the long holiday, it is advisable to continue monitoring the market and wait for further confirmation signals before opening new positions.

**Table 1. Future statistics**

(points, %, contracts)

	Close Price	% chg.	Trading Volume	Open Interest	Fair Value	Expire Date
