Market commentary & News

Market commentary

Downside risk emerging?

After struggling around the high price zone, the uptrend began to cool down and there was a risk of a decline. Nonetheless, the Real Estate sector continued to show resilience, recording notable gains.

true **E**riend

S Viet Nam Securities Corporation

At the close, the VNIndex declined by 0.69% at 1,332 pts. Meanwhile, the VN30Index decreased to 0.04% to close at 1,423 pts. Intraday trading volume and value reached 985 million shares/VND22,353bn, up 4%/3%, respectively, compared to the average of the last five sessions.

Foreign were net selling, with more than VND1,085bn, focusing on HPG, MWG, and STB with net values of VND188bn, VND132bn, and VND110bn, respectively. In contrast, they focused net buying on NVL, VIC, and GMD with net values of VND219bn, VND80bn, and VND48bn, respectively.

Banking stocks underperformed, with notable losses from VIB (-2.19%), HDB (-1.59%), CTG (-1.54%), STB (-1.45%), BID (-1.23%), TCB (-1.14%), TPB (-1.12%), VPB (-1.10%), ACB (-0.94%), LPB (-0.63%), MBB (-0.61%), VCB (-0.53%), and SHB (-0.37%).

Brokerage stocks also declined, with losses seen in VIX (-1.80%), VCI (-0.41%), MBS (-0.37%), VND (-0.32%), and SSI (-0.21%) all closing lower.

Additionally, cash also outflowed into large-cap stocks, like MWG (-3.42%), BCM (-2.57%), GVR (-2.38%), MSN (-2.21%), BVH (-1.94%), PLX (-1.15%), SAB (-1.02%), VJC (-0.57%), FPT (-0.51%), and VNM (-0.36%).

On the other hand, Real Estate sector recorded notable gains, led by VIC (+1.44%), NVL (+1.43%), VHM (+0.91%), NLG (+0.65%), and DXG (+0.28%).

After surpassing the earlier high of this year, the market fell into a state of imbalance as selling pressure intensified significantly during the session. This suggests that buying power at higher price levels remains fragile, causing upward momentum to stall. Hence, investors are advised to remain observant and wait for clearer signals.

Macro & Strategy

Chart of the day

New high formed

Market performance

The market posted a fourth consecutive week of gains, forming a new high in 2025.

▶ Chart: New high formed

The VNIndex extended its upward trend and reached a new high, confirming the short-term uptrend. Additionally, the index continued to close above the 10-, 20-, and 50-period moving averages, accompanied by rising volume. This suggests the uptrend is likely to persist in the coming sessions.

Although a pullback occurred in the last session of the week, it did not alter the current bullish trend. If a correction occurs, it is likely to be a technical pullback with strong support around the 1,300-point level.

→ The VNIndex maintains its uptrend as it forms a new high. Therefore, investors may retain their current equity allocation in portfolios.

Technical strategy: Maintain positions

Given the current situation, investors may continue to hold a high equity allocation in their portfolios while awaiting further market signals.
